

PRESS RELEASE

26.10.2016 | Airbridgecargo at the ACF

AirBridgeCargo Airlines participated in one of the most prestigious and important industry events – Air Cargo Forum and Exhibition (ACF).

ACF is organized every two years by TIACA in different parts of the world with the choice of venue between leading cities of Europe, the Americas and Asia. This year the organizers brought together over 3,000 air cargo decision makers and more than 200 exhibitors in Paris – the cultural heart of Europe and one of the premier cargo destinations in Europe.

AirBridgeCargo was presented together with its sister charter company, Volga-Dnepr Airlines, and both airlines had a wonderful opportunity to network with industry peers, customers from different countries, partners and colleagues. With the main theme of the booth decoration being “A world of logistics solutions” both ABC and VDA teams showcased their business portfolio, promoting cargo supermarket advantages, new products and services and interacting with potential and existing customers. High-tech style of the booth, its airy construction and convenient handy location close to the center of the hall made ABC and VDA the catcher of the eye, both for the visitors and exhibitors.

For AirBridgeCargo TIACA’s ACF is a must-attend event as it unites the entire air cargo supply chain, while spotting the right venue at all the times, with this year being no exception and landing in Paris, which has been one of the most important European gateways for ABC’s business since 2010. ABC and its international team of air cargo experts provided their expertise, addressed current industry challenges and discussed latest industry innovations, bringing this baggage of knowledge back home for further implementation and development.
