Statement re flight from moscow to leipzig

AirBridgeCargo Airlines (ABC) is a Russia-based company that operates an extensive network across Asia, Europe and North America aboard its freighter fleet of Boeing 747Fs and Boeing 777F.

On the 15th of January 2022 ABC's Boeing 747-8F reg. VQ-BRH operated a scheduled route (RU675) from Moscow (Russia) to Leipzig (Germany). The flight plan has been coordinated with EUROCONTROL and conducted in line with the current air traffic control guidance and regulations. AirBridgeCargo's management has always put flight safety first and operates all the flights in compliance with its internal flight safety management and aviation accident prevention code which is based on ICAO's accident prevention manual and strict internal standards.
